SUMMARY

Self-taught developer who designs, builds and runs Telegram Mini Apps and bots end to end, from React front ends to Node.js/TypeScript back ends, databases, payment APIs and deployment. I have shipped a crypto wallet/exchange Mini App with real deposits, withdrawals and swaps, and a tap-to-earn game with server-side anti-cheat. Looking for a part-time remote junior role or internship where I can contribute from day one and keep learning.

PROJECTS

AMB Wallet (@ambexchange_bot) — Telegram crypto wallet and exchange Mini App

TypeScript, Node.js, React, Vite, SQLite, REST APIs

- Integrated a third-party payment API (CCPayment) for real multi-currency deposits with unique per-user addresses, withdrawals with live fee lookup, and swaps with live quotes and a platform fee
- Supports 15+ coins (BTC, ETH, USDT, SOL, TON-network tokens and more), with 24h price changes from the CoinGecko API
- Built a cheque/gifting system and an internal ledger for tokens the payment provider can't swap
- Exposed a secret-authenticated internal API so other bots can credit user balances, with Telegram notifications

DOGS Miner (@Ambdogsbot) — Telegram Mini App tap-to-earn game

React, TypeScript, Vite, Node.js, Express, Prisma, SQLite

- Tapping, mining cycles and purchasable upgrades, with server-authoritative anti-cheat
- Monetized with in-app ad networks (Monetag, AdsGram)
- Withdrawals credited directly into AMB Wallet through its internal API, with no manual approval

Telegram Gift Deal Alerts — Python bot

- Monitors the Telegram NFT gift resale market and posts deals to a channel using per-collection price rules (fixed price or % below market)
- Self-hosted 24/7 on an Android phone with Termux, at zero server cost

DOGS Referral & Tasks Bot — Telegram bot

- Referral and task rewards paid in DOGS, with channel-membership checks, admin-managed tasks and withdrawal rules based on verified referrals

EXPERIENCE

Independent Developer — Telegram Mini Apps & bots · Remote · Present

- Design, build, deploy and maintain production Telegram apps used by real users (projects above)
- Handle the full stack alone: UI, APIs, databases, payment and ad integrations, hosting and debugging

IT Assistant (Volunteer) — Marketify SL

- Built websites and proposed digital improvements for the company
- Provided customer support

SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, HTML/CSS
- **Front end:** React, Vite, Telegram Mini Apps (WebApp API)
- **Back end:** Node.js, Express, REST APIs, Telegram Bot API, Telegraf, Telethon
- **Data:** SQLite, Prisma, better-sqlite3
- **Integrations:** payment and crypto APIs (CCPayment, CoinGecko), ad SDKs (Monetag, AdsGram), TON ecosystem
- **Tools:** VS Code, Windows/PowerShell, Linux/Termux, ngrok

EDUCATION

- **Bachillerato** (upper secondary) — IES Almunia, Jerez de la Frontera · 2nd year, 2026 – present (1st year at Institut Joanot Martorell, Esplugues de Llobregat, 2025 – 2026)
- **ESO** (secondary education) — Institut Severo Ochoa, Esplugues de Llobregat · 2021 – 2025

LANGUAGES

Persian (native) · Spanish (fluent) · Catalan (fluent) · English (B2, upper intermediate) · Chinese (A1)
